HIGHLIGHTS

Student financial aid in institutions of higher education totaled $1.3 billion in the 1966-67 fiscal year.

Non-Federal sources continued to provide more of this aid than did Federal sources. Of the federally sponsored aid, however, the Office of Education was the prime source.

This student aid was divided almost equally between public and private institutions.

Undergraduate students received most of the aid funds.

Among the publicly controlled institutions, universities led other 4-year and 2-year institutions in the amounts of aid disbursed. Among the privately controlled institutions, other 4-year institutions led the universities in the amounts of aid disbursed with the 2-year institutions third.

Among the geographical regions, there appeared a direct relationship between numbers of students enrolled and amounts of student aid disbursed.

FOREWORD

The higher education financial data for fiscal year 1966-67 will be presented in a series of four publications: Current Funds Revenues and Expenditures, Property, Student Financial Aid, and Federal Funds (the latter including data for fiscal year 1966). This publication, Financial Statistics of Institutions of Higher Education: Student Financial Aid, 1966-67, was developed from the financial questionnaire that was part of the Office of Education's Higher Education General Information Survey.

We extend our sincere appreciation to the more than 2,000 business officers and other officials of those institutions who assisted us in the development of the survey and completed the questionnaire.

Although some institutions did not provide data for this survey, this report presents estimates for national totals. Appendix A, Methodology, describes the universe and the procedure used for imputing data for nonresponding institutions in the national estimates.

SUMMARY

Student financial aid in institutions of higher education for the 1966-67 fiscal year totaled $1.3 billion. This was an increase of 28 percent over the $1.0 billion available the preceding year.

Non-Federal sources continued to lead Federal sources in providing this assistance, $679 million to $619 million. However, in 1966-67, non-Federal aid accounted for 52 percent of all student aid; in 1965-66, 56 percent.

The Office of Education remained the prime source of federally sponsored student financial aid. In 1966-67 it provided $399 million, or 31 percent of all such aid disbursed by the institutions. This is approximately the same position as in the previous year, when the Office of Education provided 28 percent of all student aid.

The student financial assistance was divided almost equally between publicly and privately controlled institutions. The figures were $694 million, or 53 percent, to the public and $604 million, or 47 percent, to the private. This is only a slight change from the 1965-66 proportions, when students in public institutions received slightly more than half of the financial assistance; and students in private institutions, the remainder.

On a per-student basis, the students in privately controlled institutions--arithmetically, at least--averaged about twice as much assistance as did students in publicly controlled institutions. This was because there were half as many students in the private institutions as there were in the public, but approximately the same amount of funds was available to both kinds of institutions.

The aid was distributed in three categories: grants, work assignments, and loans. Of the total $1.3 billion in aid in fiscal year 1966-67, $589 million, or 45 percent of the total, was in grants; $405 million, or 31 percent, in pay for work assignments; and $303 million, or 23 percent, in loans. Grants represented a larger share of the student aid in 1966-67 than they did in 1965-66 when they represented 41 percent of all aid. The work assignments category continued to represent the same share--31 percent of all student aid--as it did in 1965-66. Loans represented a smaller portion of student aid in 1966-67 than they did in 1965-66 when they were 28 percent. However, loans increased in absolute terms by $22 million over the $281 million they represented in 1965-66.

Undergraduate students continued to receive most of the aid funds in 1966-67--$903 million. Graduate students received $336 million and first-professional students received the remaining $59 million.

Although undergraduate students received 70 percent of all student aid funds, they represented over 90 percent of all student enrollment. Graduate students made up 9 percent of student enrollment; the first-professional students, 2 percent.

Of the $694 million in aid to students disbursed by public institutions in 1966-67, universities continued to lead other 4-year institutions and 2-year institutions in the amounts provided. The actual figures were $459 million, $199 million, and $35 million. The percentages were 66, 29, and 5. These are approximately the same percentages as in 1965-66. Federal sources provided more than half of the funds for the student aid in publicly controlled 4-year and 2-year institutions. Non-Federal sources continued to supply most of the student aid in the public universities.

Of the $604 million in assistance to students in private institutions, however, those in 4-year institutions received the most aid; those in the universities ranked second in aid received; and those in the 2-year schools, third. Also in contrast to the public institutions, non-Federal sources provided more than half of the funds for aid to students enrolled in private institutions.

Of the total assistance to private institutions, grants were the prime source of funds for the students. Loans were second; work assignments, third. The figures were $342 million, $147 million, and $115 million. For the public institutions, in contrast, work assignments led as a source of funds for students--with $290 million; followed by grants, $247 million; and loans, $157 million.

Among the eight geographical regions--New England, Mideast, Great Lakes, Plains, Southeast, Southwest, Rocky Mountain, and Far West--the areas with the higher enrollments generally received the larger amounts of financial aid. The Mideastern States, for example, led both in the amount of aid received and in the size of the student enrollment. The Great Lakes region was a close second, both in dollar aid received and in student enrollment. The Rocky Mountain States were lowest both in dollar aid received and in student enrollment.

APPENDIX A

METHODOLOGY

The Higher Education General Information Survey package was mailed in the spring of 1967 to the business officers or other officials of all institutions of higher education. This package contained OE form 2300-4, "Financial Statistics of Institutions of Higher Education." (See appendix D.)

Completed questionnaires were received from 2,060 institutions--a response rate of 86 percent. The numbers of respondents by level of institution, region, and State are shown in appendix B. The institutions that failed to respond or to provide adequate data are listed in appendix C.

One of two methods was used to adjust for nonresponse depending on whether or not an institution's data were available for a prior or succeeding year. If an institution had reported data for another year, those data were adjusted in accordance with trend information provided in the U.S. Office of Education publication, Projections of Education Statistics to 1977-78 (1968 Edition), and entered as the institution's report for fiscal year 1966-67.

If no other year's data were available for an institution, peer institution data for fiscal year 1966-67 were used. Peer institutions were selected on the basis of three criteria: location (State or region), level of institution, and enrollment size.

HIGHER EDUCATION GENERAL INFORMATION SURVEY

FINANCIAL STATISTICS OF INSTITUTIONS OF HIGHER EDUCATION

Report for Fiscal Year Ended _____ (month) 1967

(Report due within 3-months after close of fiscal year or November 30th, whichever is first)

NAME AND TITLE OF PERSON REPORTING:

TELEPHONE AREA CODE, NUMBER, EXTENSION:

These financial schedules are designed, in general, in categories which are compatible with groupings and definitions in College and University Business Administration, Volumes I and II, published by the American Council on Education, 1785 Massachusetts Ave., N. W., Washington, D. C.

Please complete these schedules and return them to the U.S. Office of Education not later than 3 months after the close of the fiscal year for your institution (e.g., if your fiscal year closes on May 31, the schedules should be returned to the U.S. Office of Education not later than August 31; if on June 30, by September 30; or if on August 31, by November 30).

The data requested in these financial schedules are usually published by statistical total or aggregates. In some instances, the data are published with the institution identified. Please indicate below by schedule number which schedules, if any, should not be published with institutional identification.

Please examine the definitions and instructions. If you need additional clarification on any of the items, please call Mr. Theodore H. Drews, at (202) 962-7301, in Washington, D. C.

NOTE: THE DATA PROVIDED IN THIS SURVEY MUST BE TYPED ON THESE FORMS, SINCE THEY WILL BE PROCESSED BY CHARACTER-READING OPTICAL SCANNING EQUIPMENT. PLEASE BE SURE THAT THE TYPEWRITER IS IN GOOD CONDITION, THAT THE KEYS ARE CLEAN, AND THAT THE RIBBON IS NEW. NYLON OR ONE-TIME PLASTIC BLACK RIBBONS PRODUCE THE BEST RESULTS. THE TYPING SHOULD BE CONFINED TO THE SPACE WITHIN THE PURPLE OUTLINES OR BOXES. PLEASE USE ONLY NUMBERS FOR ALL DATES, IN MONTH, DAY, AND YEAR SEQUENCE. STRIKEOVERS AND ERASURES SHOULD BE AVOIDED.

General instructions and definitions

1. General and detailed instructions and definitions are coded by number in each schedule (e.g., detailed instruction no. 13 is coded at the end of Line 1).
2. Data requested on financial statistics are for the fiscal year of your institution.

9. Detailed instructions and definitions are provided for each schedule, with the box-head items of each schedule included first and sub items included second.
